

Ban on visits by relatives or close friends

We have a lot of patients who are susceptible to infection. In order to ensure good care for them and reduce the risk of the coronavirus (Covid-19) spreading, a ban on visits is now in force.

It is not permitted to visit a relative or close friend at any of our healthcare institutes, or accompany relatives or close friends there.

Exceptions can be made based on the patient's condition. Such decisions are made by the responsible healthcare professional.

You can instead have contact with your relatives or close friends in other ways, such as via mobile phone.
